The seminar takes place in **Paris** in **June** for three days during which the laureates discover, through many presentations, the **fundamental concepts of the North American high-tech market**.

This year, the seminar will take place at Bpifrance, the sponsor of the 2019 edition of the NETVA program.

The first day will bring together all the participants, as well as a panel of experts for presentations on the **development of high technologies, business culture and local ecosystems**.

This day will be followed by **customized training** on the key concepts of startup development in the United States (strategy, marketing, financing, HR) and **individual sessions** with industry experts (investors, consultants, professors).

This seminar is also an opportunity for entrepreneurs to meet a number of investors in Paris.
